

Test PDF (H1)

This is a test PDF. The goal of which is to be able to eloquently parse it to Markdown while maintaining some syntactic meaning (i.e. tables, lists, headers ...)

This should be an H2

It should ideally parse and create headings based off of the relative font sizing

This should be an H3

Hopefully this works

Lets try Table Parsing

Easy Table

Name	Phone	Job Title
John Smith	111-111-1111	CEO
Jane Smith	222-222-2222	CTO
John Wick	666-666-6666	Security

More Difficult Table

Name	Phone	Job Title
John Smith	111-111-1111	CEO
Jane Smith	222-222-2222	CTO
John Wick	666-666-6666	Security
